SUMMARY

I am newcomer developer with a background in Mechanic and Admin with a strong logical thinking makes me interested in web development and mobile applications. Began my programming journey by finishing Hacktiv8 bootcamp as a full-stack developer, having decided to switch careers with skill in both front end & back end. I am looking to implement my skills to improve and to grow in the software development world.

EDUCATION

Hacktiv8   **Jakarta, Indonesia**
Full Stack JavaScript Immersive Program (Transcript)   *November 2023 – April 2024*

SMA N 1 WELERI   **Kendal, Indonesia**
MIPA (FISIKA)   *2017 – 2020*

WORK EXPERIENCE

AHASS NIRWANA MOTOR   **Kendal, Indonesia**
Administrator Officer   January 2021 – November 2023

- Carefully managed and planned the execution of various projects, keeping economical, administrative and physical requirements in mind.
- Handle input,output customers, output spare parts and replacement or change spareparts
- Attended meetings to discuss projects or the next event with clients, owners, and stockholders for coming soon.

Mechanic   October 2020 – January 2021

- Supervised a team of three highly skilled mechanics in the overhaul and repair of over 15 engines monthly.
- Check for an oil change, handle service, replacement spare parts, and included replacement wheels.
- Carried out warranty repairs to over 100 manufacturer guidelines that included repairs, brakes, wheels and suspension.

SKILLS

Environment: GitHub, Cloudflare, Firebase, Google Cloud Platform, Cloudinary, Visual Studio Code,

Postman, ThunderClient, Dbeaver.

Language: JavaScript, TypeScript

Front End: HTML, CSS, React Vite, React Native, Expo, Redux, Apollo GraphQL Client, EJS,

NextJs, Tailwind CSS, Bootstrap, daisyUI.

Back End: Node JS, Express, Sequelize, PostgreSQL, MongoDB, Firestore, REST API, GraphQL,

Apollo GraphQl Server, RESTful API, Redis, Axios, NextJs, MVC, Jest(Testing), Supertest, JWT, Google-Auth-Library.

PROJECTS

Sido-Store(Sidomuncul),   Maret 2024
Developing both server and client of a mini e-commerce website for a Pharmacy Sidomuncul.
Tech stack: Node JS, TypeScript, BcryptJS, React-Infinite-Scroll, Cookies-Next, Jose, MongoDB, NextJs, Zod, Tailwind CSS, useHooks and useDebounce.

K-eat,   April 2024
Developed both server and client of website that offers food,allows visitors to choose & purchase food.
Tech stack: Node JS, Axios, BcryptJS, Cors, Dotenv, Express, Google-Auth-Library, JWT,Apollo GraphQl Server, Midtrans-Client, PostgreSQL, Sequelize, React Vite, React-Router-DOM and SweetAllert2,Vue.

Markt-Place(Mobile App as Public, CMS, and Restful API),   Maret 2024
A streamlined Server-Client system integrating a Restful API, a user-friendly Mobile App for public access, and a Content Management System (CMS).
Tech stack: Node.js, Express.js, React JS, Vite, React Native, Expo Dev, Expo Map, Redux, MongoDB, Tailwind CSS, AXIOS, MVC, Cloudinary, JWT, Bcryptjs, Supertest, Jest, Firebase, Goole-Cloud-Platform, Cloudflare and Postman.

War-duh(Wardah-Clone),   Maret 2024
Developing both server and client of a mini e-commerce website for a cosmetic.
Tech stack: Node JS, TypeScript, BcryptJS, React-Infinite-Scroll, Cookies-Next, Jose, MongoDB, NextJs, Zod, Tailwind CSS, useHooks and useDebounce.

Len(Line-Clone),   Maret 2024
Developing both server and client of a social media application that allows users to interact with each other through posts, comments, like and follows.
Tech stack: Node JS, Apollo GraphQl Server, BcryptJS, Dotenv, Redis, JWT, MongoDB, Apollo GraphQL Client, React-Native, React-Navigation, Expo and Expo-Secure-Store.

Auto-Sale(AHASS-Clone),   Maret 2024
Developed both server and client of website that offers various interesting menus from around the world and allows visitors to purchase ingredients for cooking those recipes.
Tech stack: Node JS, Axios, BcryptJS, Cors, Dotenv, Express, Google-Auth-Library, JWT,Apollo GraphQl Server, Midtrans-Client, PostgreSQL, Sequelize, React Vite, React-Router-DOM and SweetAllert2.

How-To-Train-Your-Dish,   Februari 2024
Developed both server and client of website that offers various interesting menus from around the world and allows visitors to purchase ingredients for cooking those recipes.
Tech stack: Node JS, Axios, BcryptJS, Cors, Dotenv, Express, Google-Auth-Library, JWT, Midtrans-Client, PostgreSQL, Sequelize, React Vite, React-Router-DOM and SweetAllert2.

Digi-World,   Februari 2024
Developed both server and client of website that offers various interesting from Game Digimon allows visitors to purchase merchandise for collection.
Tech stack: Node JS, Axios, BcryptJS, Cors, Dotenv, Express, Google-Auth-Library, JWT, Midtrans-Client, PostgreSQL and SweetAllert2.

Auto-Bid,   Februari 2024

Description Auto Bid is an Project for managing a collection of car, allowing users to buy, sell, and view details about their car.This documentation provides details on the available endpoints and how to use them.
Tech stack: Google-Auth-Library, JWT, PostgreSQL, Sequelize, React Vite, React-Router-DOM and SweetAllert2.

Job-Gangs,   Januari 2024
Developed both server and client of the Hiring Partner website with RESTful API, optimizing operations with efficient and reliable functionalities.
Tech stack: Node.js, Express.js, React JS, Vite, Bootstrap, MVC, PostgreSQL, Sequelize, Cloudinary, JWT, BcryptJS, Supertest, Jest, Supabase, Google Cloud Platform, Cloudflare, and ThunderClient, React Vite, Axios, React-Router-DOM and SweetAllert2.

Pro-Ops,   Januari 2023
A web based e-commerce app for Game Center, Pro-Ops is an Project for managing a collection of Game, allowing users to buy, sell, and view details about their Game.
Tech stack: Express.js, Sequelize, PostgreSQL and, EJS.

Make-your-own-Playlist-Music   *December2023*
Mobile and web-based for your playlist music.
Tech stack: HTML, CSS, Object Literal, Java Script.
